

Latex Gloves

Natural Latex Powder-free *SafeTouch* Gloves

There's more to gloves than meets the eye, and our Natural *SafeTouch* Latex Powder-free gloves have several features that make them a great all-rounder for a wide range of applications, from medical to motor factors.

Perfect for tasks where sterile gloves aren't needed, their natural latex gives a 'second skin' fit and feel more comfortable than synthetic nitrile gloves, but still offering superb barrier protection. Low protein levels and minimal residual chemicals give a smoother finish and lasting protection, while the powder-free

aspect means these gloves are great for dust contamination control. There's a beaded cuff to make them easier to put on and take off, and the textured fingertips give added peace of mind when it comes to precision and grip.

These gloves are for single use only and come in boxes of 1,000, but with a shelf life of 5 years they outlast many comparable gloves in the market. If you suffer from skin allergies, you should be aware that the natural latex used in these gloves could cause some irritation. Don't worry though: we offer a wide range of synthetic non-allergenic alternatives.

- High-quality manufacturing using natural rubber for a better fit and improved performance
- Natural latex for great flexibility and comfort as well as a 5-year shelf life
- Beaded cuff for a stronger glove that's easier to put on and remove
- Medical grade 5.0g
- AQL – 1.5
- Powder free glove helps to prevent dust contamination

Our natural latex glove is already a firm favourite in the following applications:

- Cleanroom
- Janitorial
- Hospitals, medical and healthcare
- Care homes and NHS Trusts
- Dentists
- Contamination Control
- Painting and decorating
- Motor Factors
- Laboratories
- Domestic housework and gardening
