# Glow In The Dark Fire & Emergency Signs

Fulfil legal obligations and protect personnel by clearly marking escape routes even in low light situations

- ▶ Ideal for use in buildings where light could be limited should the power fail or if personnel are on-site outside of daylight hours
- ▶ Class B photoluminescent performance. Signs charge themselves by normal light, either natural or artificial – no batteries needed
- ▶ Signs should be fitted in prominent locations to aid fast and efficient evacuation
- ▶ Designs fully conform to EN ISO 7010:2012 and Health and Safety (Signs and Signals) Regulations 1996
- ▶ Manufactured to a high quality – durable signs maintain clarity and will stand the test of time
- ▶ Easy to apply 1.2mm plastic material, supplied with adhesive tabs

## Photoluminescent (Glow In The Dark) Rigid Plastic

A rigid plastic material of 1.2mm thickness which is rated Class B for photoluminescent performance, making it suitable for use in emergency signage for locations such as office buildings

# Self Adhesive Vinyl & Rigid Plastic Fire & Emergency Signs

It is a legal requirement for escape routes and assembly points to be clearly marked on your premises for the event of a fire or any emergency

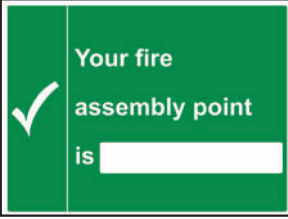

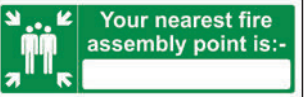

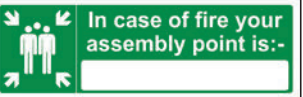

- ▶ Protect personnel and meet legal obligations. Signs should be fitted in prominent locations to aid fast, safe and efficient evacuation
- ▶ Designs fully conform to EN ISO 7010:2012 and Health and Safety (Signs and Signals) Regulations 1996
- ▶ Manufactured to a high quality – durable signs maintain clarity and will stand the test of time
- ▶ Easy to apply. Choose from self-adhesive vinyl or 1mm rigid plastic materials, supplied with adhesive tabs
- ▶ Glow In The Dark Signs should be fitted if evacuation could occur within low light areas or if the power should fail (see page 4)

# Self Adhesive Vinyl & Rigid Plastic Fire & Emergency Exit Signs

Getting to a safe location in the event of an emergency is vital for escape route planning. In most premises, dedicated fire exits provide the fastest and most effective form of evacuating your employees and visitors

- ▶ Protect personnel and meet legal obligations. Signs should be fitted in prominent locations to aid fast, safe and efficient evacuation
- ▶ Designs fully conform to EN ISO 7010:2012 and Health and Safety (Signs and Signals) Regulations 1996
- ▶ Manufactured to a high quality – durable signs maintain clarity and will stand the test of time
- ▶ Easy to apply. Choose from self-adhesive vinyl or 1mm rigid plastic materials, supplied with adhesive tabs
- ▶ Glow In The Dark Signs should be fitted if evacuation could occur within low light areas or if the power should fail (see page 6)

# Glow In The Dark Fire Door Signs

Ensure that vital instructions can be seen clearly in low light areas. All fire doors must display a 'fire door, keep shut' sign

- ▶ Ideal for use in buildings where light could be limited should the power fail or if personnel are on-site outside of daylight hours
- ▶ Class B photoluminescent performance. Signs charge themselves by normal light, either natural or artificial – no batteries needed
- ▶ Easy to apply 1.2mm plastic material, supplied with adhesive tabs. Mandatory door signs should be fitted at eye level on doors
- ▶ Conform to EN ISO 7010:2012, Health and Safety (Signs and Signals) Regulations 1996 and The Regulatory Reform (Fire Safety) Order 2005

# Glow In The Dark Fire Action Notices

In case of a fire, it is a legal requirement that your employees and visitors are aware of the correct procedure to follow to ensure that they remain safe

- ▶ Ideal for use in buildings where light could be limited should the power fail or if personnel are on-site outside of daylight hours
- ▶ Display next to fire alarm call points and in areas accessible to all employees
- ▶ Signs charge themselves by normal light, either natural or artificial – no batteries needed
- ▶ Class B photoluminescent performance
- ▶ Designs fully conform to EN ISO 7010:2012 and Health and Safety (Signs and Signals) Regulations 1996

## Photoluminescent (Glow In The Dark) Rigid Plastic

A rigid plastic material of 1.2mm thickness which is rated Class B for photoluminescent performance, making it suitable for use in emergency signage for locations such as office buildings

# Self Adhesive & Rigid Plastic Fire Action Notices

A legal requirement. Fire Action Notices provides essential information regarding action to be taken in the event of a fire or any emergency as part of a fire safety plan.

- ▶ Display next to fire alarm call points and in areas accessible to all employees
- ▶ Designs fully conform to EN ISO 7010:2012 and Health and Safety (Signs and Signals) Regulations 1996
- ▶ Manufactured to a high quality – durable signs maintain clarity and will stand the test of time
- ▶ Easy to apply. Choose from self-adhesive vinyl or 1mm Rigid plastic materials, supplied with adhesive tabs
- ▶ Glow In The Dark Signs should be fitted if evacuation could occur within low light areas or if the power should fail (see page 10)

## Photoluminescent (Glow In The Dark) Rigid Plastic

A rigid plastic material of 1.2mm thickness which is rated Class B for photoluminescent performance, making it suitable for use in emergency signage for locations such as office buildings

## CUSTOMER REVIEWS

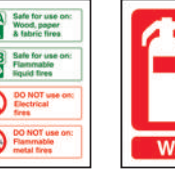

**"Very well made extinguisher ID sign which glows very well in the dark. Will order this product again when required"**

# Self Adhesive Vinyl & Rigid Plastic Fire Extinguisher Signs

In the interest of Health & Safety it is vital to inform employees how to identify the correct extinguisher in the event of a fire

- ▶ Position around your building to highlight correct usage and location of fire extinguishers
- ▶ Feature standard colours and symbols to convey a fire safety warning, message or instruction
- ▶ Designs fully conform to EN ISO 7010:2012 and Health and Safety (Signs and Signals) Regulations 1996
- ▶ Manufactured to a high quality – durable signs maintain clarity and will stand the test of time
- ▶ Glow In The Dark Signs should be fitted to allow easy identification of fire extinguishers in low light areas (see page 12)

# Self Adhesive & Rigid Plastic Fire Equipment Signs

Fulfil legal obligations by ensuring fire equipment is adequately indicated. Appropriate direction will ensure employees and visitors are fully aware of fire equipment, alarms and call points

- ▶ Protect personnel and meet your legal obligations. Signs should be fitted in prominent locations to aid efficient identification of fire equipment
- ▶ Designs fully conform to EN ISO 7010:2012 and Health and Safety (Signs and Signals) Regulations 1996
- ▶ Manufactured to a high quality – durable signs maintain clarity and will stand the test of time
- ▶ Easy to apply. Choose from self-adhesive vinyl or 1mm plastic material, both supplied with their own adhesive
- ▶ Glow In The Dark Signs should be fitted if evacuation could occur within low light areas or if the power should fail (see page 14)

# Glow In The Dark First Aid & Safe Condition Signs

Fulfil workplace obligations and ensure first aid direction and other key messages are clearly visible in areas of limited light

- ▶ Ideal for use in buildings where light could be limited should the power fail or if personnel are on-site outside of daylight hours
- ▶ Class B photoluminescent performance. Signs charge themselves by normal light, either natural or artificial – no batteries needed
- ▶ Signs should be fitted in prominent locations
- ▶ Designs fully conform to EN ISO 7010:2012 and Health and Safety (Signs and Signals) Regulations 1996
- ▶ Easy to apply 1.2mm plastic material, supplied with adhesive tabs

## Materials

**Self-adhesive vinyl** - gloss material for use on smooth, non-porous surfaces.  
**Rigid plastic** - 1mm white HIPS plastic. Supplied with adhesive tabs.

# Multi-Message Site Safety Boards

It is vital that employees and visitors are informed of safety protocol prior to entering construction areas. These signs ensure personnel are advised to take the safety precautions required to remain safe at all times

- Site Safety Signs in the red box can be customised with your company name or logo at an extra cost. **Send your company information to [sales@safetysigns4less.co.uk](mailto:sales@safetysigns4less.co.uk) or call 0800 1777 118 to discuss further**
- Highly durable – made from either 1mm (300x400 only) or 2mm rigid plastic or self-adhesive flexible vinyl where applicable
- Warns employees and visitors to your site of the potential hazards associated with demolition and construction tasks

# Electrical & Water Hazard Safety Signs

Warning signs are key to informing individuals of potential hazards and dangers to be aware of in certain areas. It is a legal requirement to carry out a formal risk assessment and clearly display the correct signs

- ▶ Designs fully conform to EN ISO 7010:2012 and Health and Safety (Signs and Signals) Regulations 1996
- ▶ Manufactured to a high quality – durable signs maintain clarity and will stand the test of time
- ▶ Easy to apply – choose from in 1mm rigid plastic or self-adhesive flexible vinyl

# Chemical Hazard Safety Signs

It is vital to inform employees and visitors of Asbestos and other dangerous chemicals that may be present in the work place

- ▶ Asbestos Signs conform to the Control of Asbestos at Work Regulations (2004)
- ▶ Chemical Signs cover the older CHIP symbols as well as the up-to-date CLP symbols
- ▶ Highly durable – made from either durable 1mm HIPS or self-adhesive flexible vinyl

## Floor Signs

### Double Sided Floor Signs

Provide clear and appropriate warning to visitors and staff

- Clearly highlight potential hazards
- Durable yet lightweight plastic with bold text printed on both sides
- Sturdy hinges allow the sign to be folded flat for easy storage
- Dimensions (mm): 300 x 575 (W x H)

To Order: Specify product code & quantity

Description	Size (mm)	Price Each
Double Sided Floor Sign	300 x 575	£12.00

# Machinery Safety Signs

Minimise the risk of personal injury and ensure employees and visitors are aware of their responsibilities

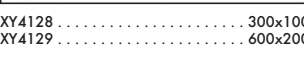

- ▶ Complies with the Health and Safety (Safety Signs and Signals) Regulations 1996
- ▶ Help employers fulfil their legal obligation to inform personnel of potential hazards and correct operation
- ▶ Conform to EN ISO 7010:2012 where applicable
- ▶ Highly durable – choose from either durable rigid plastic or self-adhesive flexible vinyl
- ▶ Place in prominent positions within the immediate vicinity of machinery along with Mandatory PPE signs (see page 33)

## Materials

**Self-adhesive vinyl** - gloss material for use on smooth, non-porous surfaces.  
**Rigid plastic** - 1mm white HIPS plastic. Supplied with adhesive tabs.

# Mandatory PPE Safety Signs

Mandatory PPE signs inform personnel when, where and which types of PPE must be worn in the interests of health and safety

- ▶ Assists in the reduction of workplace injuries and in the fulfilment of health and safety obligations
- ▶ A clear way of communicating best practice to personnel at all times
- ▶ Signs should be displayed in prominent positions with regular reminders
- ▶ Designs conform with Health and Safety (Signs and Signals) Regulations 1996 and EN ISO 7010:2012 where applicable
- ▶ Choose from self adhesive vinyl and 1mm rigid plastic materials

# Private Property & Agricultural Signs

Ideal for deterring trespassers, or informing visitors of private or agricultural areas

- ▶ Inform the public, staff and visitors of areas that are strictly off-limits, private or require extra care when accessing
- ▶ Designed to clearly display important information relating to the property and give notice of potential prosecution

## Private Signs

# General Information Signs

## Visitor Signs

From time to time all businesses will have visitors to their premises. It is important to guarantee visitor safety in addition to that of your employees by having adequate measures in place to receive them

- ▶ Displaying visitor specific signs will ensure that they are clear on what they must do to protect themselves while on your premises and where they must report to on arrival
- ▶ Highly durable – made from either durable rigid plastic or self-adhesive flexible vinyl
- ▶ Conform to EN ISO 7010:2012 and Health & Safety (Signs & Signals) Regulations 1996

# Matting & Floor Safety

## Cable Mats

Rubber backed, carpet cable mat hides unsightly leads and avoids trip hazards in the workplace

- ▶ Specially designed recess ensures cables are held securely beneath the mat
- ▶ High visibility chevrons highlight the potential hazard
- ▶ Machine washable and easy to maintain

### Look closer here

Nitrile rubber backing prevents the mat from moving

To Order:  
Specify product code & quantity

Code	Description	Size (cm)	Price Each
XY2937	Cable Mat	40 x 121	£27.50

**ONLY**  
**£27.50**  
**EACH**

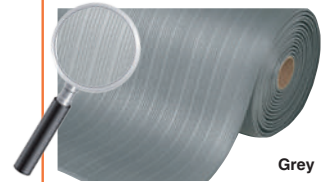

## Easy Step Anti-Fatigue Mat

Increase comfort and productivity by providing relief from leg and back ache when standing for long periods of time

- ▶ Ideal for dry areas such as assembly lines, checkouts, work stations and packing areas
- ▶ Closed cell vinyl foam construction makes long standing jobs more comfortable
- ▶ Insulates feet from cold floors
- ▶ Available in two colours; Black and Grey (please specify when ordering)

### Look closer here

Ribbed surface and bevelled sides enhance foot traction to minimise slipping

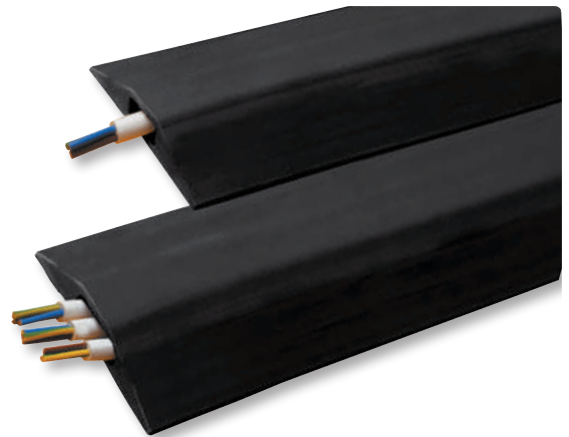

To Order: Specify product code & quantity

Code	Description	Size (cm)	Depth (cm)	Price Each
XY7110	Easy Step Anti-Fatigue Mat	60 x 90	0.9	£26.40
XY7111	Easy Step Anti-Fatigue Mat	90 x 150	0.9	£62.05

## Black Cable Protectors

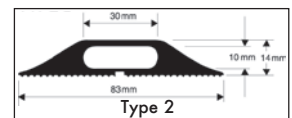

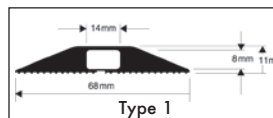

Rubber cable covers prevent slips and trips by protecting and keeping cables tidy

- ▶ Ideal for use in most workplaces, office and schools
- ▶ Suitable for external use - ideal for temporary road crossings and where light traffic may cause damage to cables
- ▶ Easy to install, simply 'snap and fit' to the cables within the protector
- ▶ Available in two types; Type 1 for 1 or 2x10mm cables, Type 2 for 2 to 3 x 10mm cables or more smaller ones

To Order: Specify product code & quantity

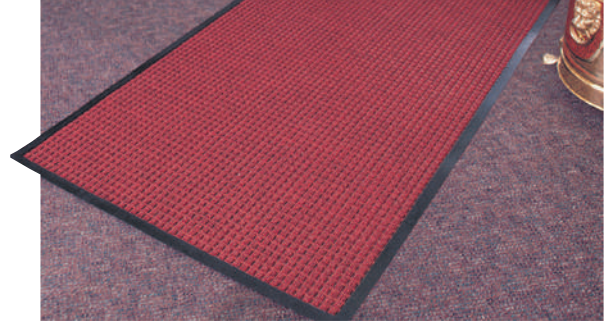

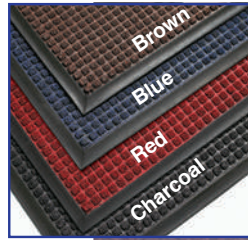

Code	Description	Width (mm)	Length (m)	Height (mm)	Price Each

# Safety & Regulation Posters

## Manual Handling Operations

**Manual Handling Operations Regulations 1992**

Under these regulations, made under the health & safety at work act 1974, from 1st January 1993 additional duties are placed on employers to avoid hazardous manual handling operations so far as is reasonably practicable. Assess unavoidably manual handling operations. Take steps to reduce the risk of injury from such operations so far as is reasonably practicable.

**Good manual handling - what you need to know**

**1. Manual Lifting and Handling**  
It does not require a great deal of weight to cause back injuries through lifting and handling. There are eight points to good manual handling. These are:

1. Check load
2. Assess posture and posture carrying to and from it to be carried to - what does it weigh? Is it an awkward shape? Will it rub or be a hazard?
3. Personal technique

**2. Personal technique**  
Keep the line of your back fairly straight as you lift, stretch, twist or carry. Do not bend, get high.

**3. Proper Grip**  
Make sure you have a good hand hold. Grip with the palms of the hands and the heels of the fingers. Never lift with the fingers.

**4. Breathe**  
Face the direction of load if lifting down. Breathe over the object. Feet should be well apart and one slightly in front of the other. Make sure your knees are bent.

**5. Arms Close to Body**  
Keep the arms close to the body. This means that the legs and body bear the weight instead of the back and arms.

**6. Chin to Chest**  
Bend, keep the head slightly and take the lift in. This helps to keep the back straight.

**7. Body Straight**  
Do some of your body weight and how to use it to best advantage. Use your body as a lever to help to lift or move objects.

**8. Coordinate effort**  
When two or more people are involved in the lift make sure the handling is co-ordinated carefully.

## Handling Chemicals Safely

**Handling Chemicals Safely**

- All chemicals should be clearly marked
- Be aware of the storage requirements of each type
- Take extreme care when mixing chemicals
- Wash away from head and flames
- Avoid oral contact of any kind
- Never inhale
- Avoid contact with skin and eyes

**Chemical Checklist**

- Read and understand the label before opening any container
- Double-check that the chemical you are opening is the one required
- Consider the hazards, including violent reactions between chemicals
- Open container carefully in a well-ventilated area
- Always wear appropriate protective clothing
- Take extreme care while using hazardous chemicals
- Use a method which reduces risk of inhalation, ingestion or contact with skin, eyes and clothing
- Never eat, drink or smoke whilst handling chemicals
- Always seal container tightly after use

**Know your CoSHH and GHS Warning Symbols**

Distanna, Irritant, Health Hazard, Oxidising, Corrosive, Toxic, Flammable, Explosive, Compressed Gas, Health Hazard, Environmental Hazard

XYO130 ..... 400x600

## Controlled Substances Hazardous To Health

**Control of Substances Hazardous to Health Regulations 2002 (CoSHH)**

Under CoSHH all persons at work need to know the safety precautions to take so as not to endanger themselves or others through exposure to substances hazardous to health.

**What you need to know**

**Employers Must**

- Assess health risks to employees and others working on the premises.
- Initiate procedure to control and monitor unavoidable exposure to substances which may harm the health of employees and others on the premises.
- Provide information and training relevant to the hazards associated with in each area of work to ensure that all personnel are aware of the risks involved and preventive measures taken to control them.

**Employees Must**

- Make full and proper use of any control measure, personal protective equipment (PPE) or other facility provided.
- Report any defects found in the control measures, PPE or facilities provided.
- Follow the instructions provided with data sheets or other safety information and only use and dispose of substances in the recommended manner.

**Get to know the warning symbols**

OXIDISING, CORROSIVE, TOXIC, IRRITANT, ENVIRONMENTAL HAZARD, EXPLOSIVE, FLAMMABLE, COMPRESSED GAS, HEALTH HAZARD

XYO131 ..... 400x600

## Display Screen Equipment Regulations

**Health & Safety (Display Screen Equipment) Regulations 1992**

These regulations require employers to perform suitable and sufficient assessment of work stations used by users or operators, to identify risks to health and safety and to reduce the risk to health and safety to the lowest extent so far as is reasonably practicable.

**Workstation requirements**  
What you need to know

- Display Screen**  
The workstation shall be clearly defined and clearly marked, of adequate size and spacing between the operators and their workstation.
- Keyboard**  
The keyboard shall be placed and supported from the screen, have a matt surface and the keys shall be adequately contrasted and lighted from the viewing position.
- Work Surface**  
The work surface shall be sufficiently large with the reflective surface and allow flexible arrangement of equipment and documents.
- Work Chair**  
The work chair shall be stable, and allow the use of arms of movement and comfortable sitting posture. The seat of the chair shall be height adjustable and become able to recline in height and tilt. A footrest shall be provided to suit reclining use.
- Space Requirements**  
The workstation shall be of sufficient dimensions to provide enough space to change position and vary movements.
- Lighting**  
Room lighting and task lighting provided shall ensure satisfactory lighting conditions. The seat of the chair shall be height adjustable and become able to recline in height and tilt. A footrest shall be provided to suit reclining use. Flexible shading devices and reflectors shall be provided to suit reclining use.
- Reflectors & Glare**  
Workstations shall be designed so that reflections and glare, including computer screens, do not cause direct glare or disturbing reflections on to the person.
- Noise**  
Noise emitted by the workstation equipment shall not impede the communication or verbal speech of the operators.
- Humidity**  
Workstation equipment shall not produce excess heat, to the detriment of the operator and an adequate level of humidity shall be maintained.
- Computer / User Interface**  
The software to be used should be suitable for the task and adequate in relation to the ability levels of the operators. No operating without operators' knowledge and experience to be involved in such change whenever possible.

XYO136 ..... 400x600

## Controlling Damage From Noise At Work

**Controlling damage from noise at work**

Inevitable damage to hearing can be caused by exposure to high noise levels. The control of noise at work regulations 2005 place duties on employers and employees to reduce the risk of damage to hearing at work. Ensure you are familiar with the categories of risk and the actions to be taken.

**What you need to know**

**Employers Must**

## PUWER Guidance Poster

**Provision and Use of Work Equipment Regulations 1998 (PUWER)**

These regulations require employers to provide a health and safety assessment of any work equipment that they use at work, to prevent or control any risk that may be caused by the use of that equipment.

**General Provisions**

In general terms, the regulations require that equipment provided for use at work is:

- Substantially for intended use.
- Safe for use, maintained in a safe condition and, in certain circumstances, inspected to ensure this remains the case.
- Accompanied by suitable safety measures, e.g. protective devices, markings and warnings.
- Used by people who have received adequate information, instruction and training.

**Main Provisions**

**Employers must ensure that:**

- Equipment is safe to use.
- Only fully trained personnel are allowed to use equipment where there is a specific risk.
- Work equipment provided is suitable, maintained and used without risk.

**Employees:**

Do not have duties under PUWER, but do have general duties under the HSW Act and the Management of Health and Safety at Work Regulations 1999, for example to take reasonable care of themselves and others who may be affected by their actions and to cooperate with others.

## Working At Height Regulations

**The Work at Height Regulations 2005**

The Work at Height Regulations 2005 are applicable to work of any kind at height, where there is a risk of a fall that may cause personal injury.

**What an employee must do**

- Report any potential or existing safety hazard to employer
- Follow any training and instructions provided by employer
- Ensure the equipment is fit for use, in good condition and any components should be reported back before commencing work
- Use the equipment equipment properly

**Duty holders are required to:**

- Plan and supervise the work to be carried out
- Where working at height is unavoidable, use work equipment or substance other than ladders
- Where a risk of fall cannot be eliminated, use work equipment or other appropriate measures to reduce the height and consequences of a potential fall

**What an employer must do**

- Plan and supervise the work to be carried out to prevent falling
- Follow the Regulations unless it is necessary to manage and control equipment for work at height
- Ensure all work at height is properly planned and organised, taking account of weather conditions that could endanger the safety of personnel
- Provide adequate training to ensure those working at height are competent to undertake work
- Ensure plans and height of work is safe
- Appropriately inspect all equipment provided for work at height
- Prevent control risks from height surfaces
- Control the risks from falling objects

XYO128 ..... 400x600

## Health & Safety Law Posters

Fulfil health & safety obligations by prominently displaying this legally required updated version of the Health and Safety Law Poster

- ▶ A legal requirement in all workplaces since 5th April 2014
- ▶ Large format A2 size (415 x 595mm) provides added prominence and ease of reading
- ▶ Embedded hologram provides proof of authenticity
- ▶ 350 micron thickness biodegradable encapsulated plastic for durability

Offshore
